                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The present sequence is a novel protein kinase. The novel protein kinases and the nucleic acids that encode them may be used in the treatment and diagnosis of diseases associated with inappropriate kinase expression such as immune-related disease and disorders, cardiovascular disease, neurodegenerative diseases and/or cancers. The nucleic acids and complementary sequences may also be used as DNA probes in diagnostic assays. The kinase polypeptides may be used as antigens in the production of antibodies of kinase expression and activity. Anti-kinase antibodies and kinase antagonists may also be used to down regulate kinase expression and activity include rheumatoid arbitis, atherosclerosis, autoimmune disorders, complications of organ transplantation, myocardial infarction, immune disorders, cardiomyopathies, strokes, renal failure, oxidative-stress related disorders, chronic inflammatory bowel disease, chronic inflammatory pelvic disease, multiple sclarosis, asthma, osteoarthritis, disease; cancers and reproductive
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         EVFENSSKIVIVMEYASRGDLYDYISERPRLSERDARHFFRQIVSALHYCHQNGIVHRDL 180.

New polypeptides, useful for diagnosing, treating or preventing disorders of growth and development, cardiovascular and lipid, and diseases such as cancer, comprise human kinase polypeptides.

English Claim 1; Page 152-153; 197pp; The invention relates to human kinase PKIN proteins and their corresponding cDNAs. A composition containing PKIN agonist is useful for treating a disease or condition associated with decreased expression of PKIN and a composition comprising PKIN antagonist is useful for treating a disease or condition associated with overexpression of PKIN. The disorders include cancer (leuksemia, adenocarcinoma, lymphoma, melanoma, allergies, adult respiratory distress syndrome, atterosolerosis, postorias, gondopatores, gondopature's syndrome, Graves' disease, creamatoid arthritis, slogren's syndrome, uveitis, ulcerative colitis, bacterial, parasitic, fungal, viral, protozoal and helminthic infections) growth and development disorders (arteriosclerosis, cirrhosis, repartits, cusening's syndrome, hypothyroidism, cerebral palsy, cataracts); cardio vascular disease (arteriovenous fiscula, hypertension, vasculitis, isohaemic heart disease, chronic bronchitis, lung tumours); lipid disorder (fatty liver, Fabry's disease, Niemann-Pick's disease, hypochity, hypocholesterolaemia, obesity). PKIN DNA is useful for assessing toxicity

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Description

123233 hypothetical protein B0496.3 - Caenorhabditis elegans C;Species: Caenorhabditis elegans C;Date: 15-Oct-1999 #seguence\_revision 15-Oct-1999 #text\_change 15-Oct-1999

Cincession: T29253
R.Murray, J.; Le, T.T.
Submitted to the EMBL Data Library, May 1996
A; Describtion: The sequence of C. elegans cosmid B0496.
A; Reference number: Z20596
A; Recession: T29253
A; Residues: preliminary; translated from GB/EMBL/DDBJ
A; Residues: preliminary; translated from GB/EMBL/DDBJ
A; Residues: 1-1558 wMRA.
A; Residues: 1-1558 wMRA.
A; Residues: 1-1558 wMRA.
A; Residues: EMBL: U58749; PIDN: AAB00636.1; GSPDB: GN00022; CESP: B0496.3
A; Resperimental source: strain Bristol N2; clone B0496
C; Genetics:

serine/threonine-specific protein kinase (BC 2.7.1.-) AK21 - Arabidopsis thaliana serine/threonine-specific protein kinase SNF1 homolog ($) Species: Arabidopsis thaliana (mouse-ear cress) ($) Species: Arabidopsis thaliana (mouse-ear cress) ($) Species: Arabidopsis thaliana (mouse-ear cress) ($) Species: Arabidopsis thaliana (mouse-ear cress) ($) Accession: JC1446; S58266; S66334 ($) Seed 120, 249-254, 1992 ($) Seed 120, 249-254, 1992 ($) Seed 120, 249-254, 1992 ($) Species: A. Thomas, M.; Bianchi, M.; Halford, N.G.; Kreis, M. Gene 120, 249-254, 1992 ($) A; Title: Structure and expression of a gene from Arabidopsis thaliana encoding a protein A; Reference number: JC1446; MUID:93013041; PMID:1339373 ($) Ascession: JC1446 ($) A; Molecule type: DNA A; Residues: 1-512 clEG ($) A; Cross-references: UMIPROT:038997; GB:M93023; NID:g166599; PIDN:AAA32736.1; PID:g166600 A; Thuemmler, F.; Kirchner, M.; Teuber, R.; Dittrich, P. Sthuemmler, F.; Kirchner, M.; Teuber, R.; Dittrich, P. Submitted to the BMBL Data Library, May 1995 A; Description: Differential accumulation of the transcripts of 22 novel protein kinase gf A; Reference number: S58256
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     or peptidyl-threonine
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           7
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        115
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    175

A; Residues: 1-504 <GUM>
A; Cross-references: UNIPROT: P93113; EMBL: Y10036
A; Experimental source: cv. Masterpiece; cotyledon
C; Function:
A; Description: catalyzes the formation of peptidyl-serine-phosphate or peptidy
C; Superfamily: AMP-activated protein kinase; protein kinase homology
C; Keywords: ATP; phosphotransferase; serine/threonine-specific protein kinase
F; 6-260/Domain: protein kinase homology <KIN>

A; Description: catalyzes the formation of peptidyl-serine-phosphate or peptidyl-threonin c; Superfamily: AMP-activated protein kinase; protein kinase homology
C; Keywords: ATP; magnesium; phosphotransferase; serine/threonine-specific protein kinase
C; Superfamily: AMP-activated protein kinase homology
C; Keywords: ATP; magnesium; phosphotransferase; serine/threonine-specific protein kinase
F; T1-271/Domain: protein kinase homology
C; Keywords: ATA, A44/Active site: Lys, Glu, Asp, Lys #status predicted
F; 147,151/Binding site: magnesium (Asn, Asp) #status predicted
                                                                                                                                                                                                                                                                 genes

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 11,
